Battery Maint. Programmes

Properly maintained forklift batteries and chargers perform better and last longer. This reduces your overall costs and improves your bottom line. Let our experienced team of professionals provide you with service that will maximize performance and efficiency of your batteries and chargers. Below is a brief description of our AMP Battery and Charger Planned Maintenance Program

Forklift Battery Planned Maintenance

Visual inspection of all components; cables, connectors, vent caps, cell covers compound, tray, single point watering, etc...

Voltage readings on every cell and specific gravity readings of target cells

Replacement of missing or damaged vent caps at no charge

Replacement of damaged inter-cell connector covers at no charge

Battery cables will be spot tied in correct position

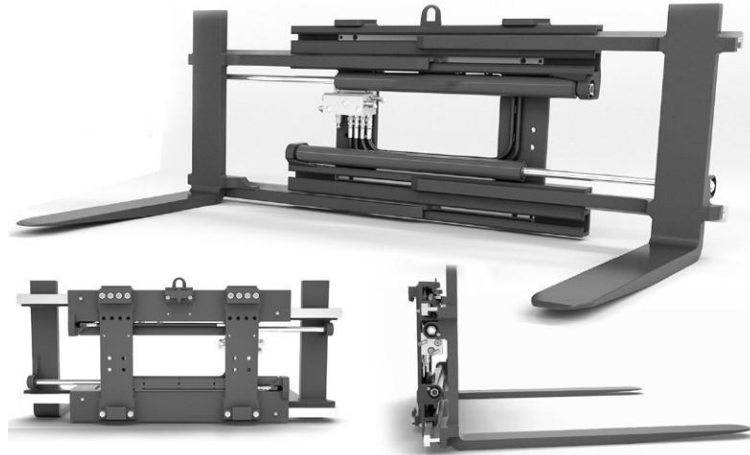

Water additions will be made during inspection

Minor cable damage will be repaired with heat shrinkable tubing at not charge

Fork Positioner- Attachments Sale-Rental

Fork Positioners are amongst the most popular attachments on the market. Many manufacturers make various types with different widths. Fork positioner allows unlimited use of the device regardless of the width of the forklift to transport the load.

Paper Roll Clamp- Attachments Sale-Rental

The handling of paper rolls possesses a particular challenge for the forklift. With a paper roll clamp, the rollers which are either lying or standing, are taken from the truck for further storage or Transport. Paper roll clamps are available with 180 degree rotation and 360 degree rotation.

Block Clamp- Attachments Sale-Rental

The Block Clamp can lift stacks of blocks or bricks without a pallet by clamping them between the hydraulically actuated clamp arms. Since there is no need to load the blocks onto pallets, the labor and pallet cost involved in doing so is eliminated.

Type of Special Attachments - Sale Rental

Paper Roll Clamps

Bale Clamps

Carton Clamps

Tobacco Carton Clamps

Rotator

Hinged Forks
